

Hepatitis C (HCV or Hep C for short) affects some groups of people differently than others.

Latinos

- It is believed that HCV **will advance more quickly** in Latinos as a group than in other populations who have hepatitis C.
- There are many drugs to treat HCV. Talk with your doctor or nurse about the drugs to treat HCV.
- The drugs to treat HCV can cure up to 100% of people who are treated.

REMEMBER

Talk with your doctor
or nurse about...

- ways to stay healthy – including eating a healthy diet that includes plenty of fruit, vegetables, and lean meat.
- your treatment options.
- an exercise program that is right for you.

Get Tested. Get Treated. Get Cured.
